Objection to Trademark

The use of the trademark Pantone ® has been noted throughout this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Rejections based on 35 U.S.C. 112, first paragraph

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-19 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. .

First, the use of the terminology "first pantone of colors" is not understood. Pantone ® is the registered trademark of a company Pantone, Inc.

Second, the method step of "correlating the skin color, the eye color and shape to a particular color for the dental prosthesis" is not described in the specification in

such a way as to enable one skilled in the art to which it pertains to make or use the invention. The specification provides no clue as to how these factors in any way correlate to provide for the color of a dental prosthesis.

Rejections based on 35 U.S.C. 112, second paragraph

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-19 contain the trademark/trade name Pantone ®. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name.

Moreover, it is unclear what goods the use of the company name Pantone is even attempting to identify.

In regard to claims 6 and 7, the arbitrary assignment of percentages is not understood.

Rejections based on Prior Art

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 8-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Albert et al (US 5,951,291).

Abert et al disclose a method wherein the size and color of a person's prosthetic teeth may be "selected to harmonize with the user's own coloring (skin tones, hair color, eye color)" (column 8, lines 32-41). Such harmonization would inherently require a person to identify the user's skin color, eye color and hair color. The Albert et al "harmonize" is deemed to meet applicant "correlating" limitation.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6, 7, 18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Albert et al (US 5,951,291).

It would have been obvious to one of ordinary skill in the art to have take the picture of the Albert et al Figure 2 user with a common digital camera so that one could view the image. In regard to claims 18 and 19, a common digital camera includes a computer to process and modify the sensed image and store it in memory. In regard to claims 7 and 8, the digital camera would assign percentages of different colored pixes to make up the picture.

Prior Art

Applicant's information disclosure statement of March 01, 2004 has been considered and an initialed copy enclosed herewith.

Lapointe et al (US 5,639,235), Fischer (US 5,692,900), O'Brien (US 6,007,332), Morris et al (US 6,190,170) and Jung et al (US 6,254,385) are made of record.
